Lydbrook, Gloucestershire, UK, 21 May 2025, Chronos Technology Ltd, an international leader in resilient synchronisation and timing solutions, is delighted to announce the acquisition of the business activities of Norwegian company UPLINK AS.

UPLINK is the leading supplier of time and timing systems and test equipment for the Norwegian market. Established in 1990 by owner and Managing Director Joachim Nielsen,

UPLINK supplies solutions to the telecoms, IT, transport, frequency and timing, power grid, offshore and defence markets.

Joanne Akers, Managing Director of Chronos Technology said: “This strategic agreement will enhance the Chronos presence in Scandinavia enabling us to deliver Microchip’s solutions into the Norwegian market underpinned by our expertise and professional services. I am delighted to work with Joachim to further support our Norwegian customers and ensure a seamless integration of business activities.”

### **About Chronos Technology**

Chronos Technology is a leading international authority in resilient synchronisation and timing systems, smart solutions and cyber security solutions for critical national infrastructure with unrivalled industry experience gathered over 35 years in GNSS, PTP, NTP and SyncE. Working closely with our customers and their evolving requirements, our team of technical experts provide complete solutions, delivering best performance for timing & navigation applications.

Chronos Technology is also recognised as a leading authority in GNSS and is a specialist supplier and installer of GNSS (GPS, GLONASS, Galileo and BeiDou) simulators, repeaters, receivers, antennas and infrastructure. Chronos is also a world leader in GNSS vulnerabilities, jamming and interference detection and location technology, and a supplier of underground GNSS coverage solutions. We work with industry leading suppliers and have formed long standing relationships with our customers, supplying a variety of sectors including the Royal Air Force, Ministry of Defence, aerospace, UAV, police, fire & rescue, manufacturing, automotive, marine and telecoms.
